Objective

Mid-level MERN developer focused on React.js, Redux, and Next.js seeking to build high-performing, scalable user interfaces. Adept at crafting responsive HTML5/CSS3 layouts and collaborating closely with stakeholders to deliver business-ready features. Eager to contribute strong communication and front-end expertise to a product-driven team.

Professional Summary

- 3+ years of hands-on experience building React.js and Next.js applications with Redux for predictable, scalable state management.
- Expertise in semantic HTML5, modern CSS3, and responsive design; created reusable component libraries with Tailwind CSS/Bootstrap and adhered to accessibility standards.
- Strong communicator who partners with designers, developers, and stakeholders; contributes to code reviews, maintains clean code, and optimizes performance via SSR/SSG and code-splitting.

Education

B.Tech in Computer Science and Engineering – Dr. Babasaheb Ambedkar Technological University (DBATU)

Professional Experience

Front End Developer – Delta 360 Services Pvt Ltd   Sep 2023 – Present

- Built feature-rich user interfaces using React.js and Next.js with semantic HTML5 and modern CSS3, ensuring responsive, pixel-perfect layouts.
- Implemented Redux/Redux Toolkit for predictable global state management, including slice architecture, middleware, and store optimization.
- Developed SSR/SSG pages in Next.js, optimized routing, dynamic imports, and image handling to improve performance and SEO.
- Created reusable UI components and design systems with Tailwind CSS/Bootstrap, following accessibility (a11y) and cross-browser standards.
- Collaborated with designers and backend teams; participated in code reviews, sprint ceremonies, and communicated progress and risks clearly to stakeholders.
- Reduced initial load time by ~35% through code-splitting and SSR/SSG optimizations, improving Lighthouse performance scores.
- Increased development velocity by ~20% by establishing a reusable component library and enforcing coding standards.
- Improved UI consistency and reduced defects by instituting structured review checklists focused on accessibility and responsiveness.

Front End Developer Intern – Delta 360 Services Pvt Ltd   Mar 2023 – Aug 2023

- Assisted in building React components and Next.js pages with Redux-based state management for shared modules.
- Styled components and pages using CSS3, Tailwind CSS, and Bootstrap to ensure responsiveness and cross-browser compatibility.
- Participated in daily stand-ups, demos, and code reviews; communicated blockers and progress effectively to the team.
- Accelerated UI delivery by creating shared component patterns, reducing duplicated code across modules.
- Contributed to consistent look-and-feel and reduced style inconsistencies by aligning implementations with the design system.

Projects

GizSpy

- A device discovery and comparison platform built with Next.js and React. Implemented SSR/SSG for fast load and SEO, Redux Toolkit for state, and responsive UI with Tailwind CSS and semantic HTML/CSS.
- **Tools:** Next.js, React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Chat-App

- Responsive messaging UI built with Next.js and React, leveraging Redux for message/user state and accessible, semantic HTML5/CSS3 forms and components.
- **Tools:** Next.js, React.js, Redux Toolkit, HTML5, CSS3

Technical Skills

TechnicalSkills: React.js, Next.js, Redux, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, Cross-browser Compatibility, Accessibility (a11y), Git, GitHub, npm, yarn, VS Code
SoftSkills: Strong Communication, Collaboration, Stakeholder Management, Problem Solving, Code Review, Attention to Detail, Agile/Scrum, Time Management

Languages

English, Hindi
