PROFESSIONAL SUMMARY

MERN Stack and Frontend-focused Full Stack Developer with 3.5+ years of experience at Cognizant and Capgemini building scalable, responsive, production web applications with **React.js, Next.js, TypeScript, Node.js, Express.js and MongoDB**. Strong in reusable component architecture, Redux Toolkit state management, Next.js server-side rendering, REST API design, JWT authentication and role-based access control, real-time features with Socket.io, and Jest testing. Experienced with micro-frontend architecture and integrating LLM/AI APIs into web applications. Works across the full SDLC in Agile/Scrum teams, collaborating closely with product, UI/UX, QA and DevOps.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR), JavaScript (ES6+), TypeScript, Redux, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, Component-Based Architecture, Micro Frontends

Backend: Node.js, Express.js, RESTful APIs, Middleware, Webhooks, Socket.io / WebSockets, JWT Authentication, Role-Based Access Control, Third-Party & LLM/AI API Integration

Databases: MongoDB, Mongoose, PostgreSQL, SQL Server

Testing & Quality: Jest, Unit Testing, Integration Testing, API Testing (Postman), Code Review, Debugging

Tools & Practices: Git, GitHub, npm, yarn, VS Code, Postman, Ubuntu, Front-end Cloud Deployment, CI/CD, Agile/Scrum, SDLC

Languages: JavaScript, TypeScript, SQL, Java

PROFESSIONAL EXPERIENCE

Full Stack Developer — Cognizant ***May 2025 – Present***

- Build enterprise-grade web applications with React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB and PostgreSQL.
- Develop reusable, responsive React.js component libraries with Redux Toolkit and Tailwind CSS; manage state across complex multi-module applications.
- Use Next.js server-side rendering to improve performance, SEO and initial page load; build real-time features with Socket.io and WebSockets.
- Design RESTful APIs with Node.js and Express.js, including routing, validation, middleware and centralized error handling.
- Implement JWT authentication, role-based access control and API-level authorization.
- Integrate internal and third-party APIs for enterprise workflows; optimize MongoDB and PostgreSQL queries to reduce response times.
- Write Jest unit and integration tests, take part in code reviews, and resolve production defects.
- Collaborate with QA, DevOps, business analysts and product owners in Agile ceremonies; contribute to technical and API documentation.

Full Stack Developer — Capgemini ***Jan 2023 – Mar 2025***

- Developed and maintained full-stack MERN and Next.js applications with React.js, Node.js, Express.js, MongoDB, PostgreSQL and REST APIs.
- Built reusable, component-driven React.js interfaces in JavaScript, TypeScript, HTML5, CSS3 and Tailwind CSS, responsive across desktop, tablet and mobile.
- Implemented Redux Toolkit for centralized state management, improving data flow and reducing state-related bugs.
- Developed secure REST APIs with JWT-based authentication and role-based authorization.
- Designed MongoDB schemas with Mongoose and wrote SQL queries for PostgreSQL and SQL Server.
- Improved API performance through query optimization, pagination, validation and a reusable service-layer architecture.
- Integrated third-party APIs for business workflows, data synchronization and notifications.
- Wrote Jest unit and integration tests; used Git/GitHub branching, pull requests and code reviews; troubleshot production defects across frontend, backend and database layers.

PROJECTS

Enterprise Customer & Order Management Platform

React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, Redux Toolkit, JWT, Tailwind CSS, Jest

- Built a MERN + Next.js platform for customer profiles, products, orders and transactions, with dashboards, search, filtering, pagination and reporting.
- Developed REST APIs for customer, product, order and user management with JWT authentication and role-based access for admin, operations and business users.
- Modeled MongoDB collections with Mongoose and wrote PostgreSQL reporting queries; shared state across modules with Redux Toolkit.
- Used Next.js SSR plus client- and server-side validation for performance and reliability; integrated third-party notification and data APIs.

Enterprise Digital Service & Real-Time Communication Platform

React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, Redux Toolkit, Socket.io, JWT, Tailwind CSS, Jest

- Developed responsive React.js dashboards and business workflows backed by Node.js, Express.js and TypeScript services.
- Implemented real-time notifications and messaging with Socket.io, alongside JWT authentication and role-based access control.
- Standardized validation, error handling, logging and API responses; optimized MongoDB and PostgreSQL queries.
- Wrote Jest unit and integration tests and delivered production fixes within sprint timelines.

EDUCATION

B.Tech – Computer Science and Engineering ***2023***

Dr. Babasaheb Ambedkar Technological University (DBATU)
